

## **Deciphera Pharmaceuticals, Inc. to Announce First Quarter 2020 Financial Results and Host Conference Call and Webcast on May 5, 2020**

April 28, 2020

WALTHAM, Mass.--(BUSINESS WIRE)--Apr. 28, 2020-- Deciphera Pharmaceuticals, Inc. (NASDAQ:DCPH), a clinical-stage biopharmaceutical company focused on addressing key mechanisms of tumor drug resistance, today announced that it will report its first quarter 2020 financial results on Tuesday, May 5, 2020.

In connection with the earnings release, Deciphera's management team will host a live conference call and webcast at 4:30 PM ET on Tuesday, May 5, 2020, to discuss the Company's financial results and provide a corporate update.

The conference call may be accessed by dialing (866) 930-5479 (domestic) or (409) 216-0603 (international) and referring to conference ID 5381739. A webcast of the conference call will be available in the "Events and Presentations" page in the "Investors" section of the Company's website at <https://investors.deciphera.com/news-events/events-presentations>. The archived webcast will be available on the Company's website approximately two hours after the conference call and will be available for 30 days following the call.

### **About Deciphera Pharmaceuticals**

Deciphera Pharmaceuticals is a clinical-stage biopharmaceutical company focused on improving the lives of cancer patients by tackling key mechanisms of drug resistance that limit the rate and/or durability of response to existing cancer therapies. Our small molecule drug candidates are directed against an important family of enzymes called kinases, known to be directly involved in the growth and spread of many cancers. We use our deep understanding of kinase biology together with a proprietary chemistry library to purposefully design compounds that maintain kinases in a "switched off" or inactivated conformation. These investigational therapies comprise tumor-targeted agents designed to address therapeutic resistance -causing mutations and immuno-targeted agents designed to control the activation of immunokinases that suppress critical immune system regulators, such as macrophages. We have used our platform to develop a diverse pipeline of tumor-targeted and immuno-targeted drug candidates designed to improve outcomes for patients with cancer by improving the quality, rate and/or durability of their responses to treatment.
